Mr. Papa Bear
450 Goldilocks Way
Woodsville, USA

Dear Sir:

I am writing this letter about a special chair that my partner and I made.

We made it with wood, but here is the catch; we made steel bars inside so it is very sturdy. For more safety we added an extra bar for no cost. Baby bear is going to be more secure because of this invention. So here is the price. It is 710.00 dollars even.

I learned that a triangle is the sturdiest shape. But a square is very flimsy. So that would not be very good unless you make triangles in it.

I hope to hear from you soon.

Sincerely,

Nicholas Meadows
