SECTION 1. Product and company identification

1.1. Product identifier

Product form: Substance
Name: Carbon Dioxide, Solid or Dry Ice
CAS No: 124-38-9
Formula: CO2
Other means of identification: Dry ice (nuggets, pellets, or blocks), carbonice, carbonic anhydride

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the substance/mixture: Industrial use. Use as directed.

1.3. Details of the supplier of the safety data sheet

Praxair, Inc.
39 Old Ridgebury Road
Danbury, CT 06810-5113 - USA
T 1-800-772-9247 (1-800-PRAXAIR) - F 1-716-879-2146
www.praxair.com

1.4. Emergency telephone number

Emergency number: Onsite Emergency: 1-800-645-4633

CHEMTREC, 24hr/day 7days/week — Within USA: 1-800-424-9300, Outside USA: 001-703-527-3887 (collect calls accepted, Contract 17729)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (GHS-US)
Not classified

2.2. Label elements

GHS-US labeling
Hazard pictograms (GHS-US): None

Signal word (GHS-US): Danger
Hazard statements (GHS-US):
CGA-HG01 - MAY CAUSE FROSTBITE. MAY CAUSE CRYOGENIC BURNS OR INJURY.
CGA-HG03 - MAY INCREASE RESPIRATION AND HEART RATE. VAPOR MAY DISPLACE OXYGEN AND CAUSE RAPID SUFFOCATION

2.3. Other hazards

Other hazards not contributing to the classification: Refrigerated solidified gas. CONTACT WITH PRODUCT MAY CAUSE COLD BURNS OR FROSTBITE.

Dry ice sublimes to carbon dioxide vapor at -109°F (-78°C). VAPOR MAY DISPLACE OXYGEN AND CAUSE RAPID SUFFOCATION.

2.4. Unknown acute toxicity (GHS-US)

No data available

SECTION 3: Composition/information on ingredients

3.1. Substance

EN (English US) SDS ID: P-4575
Carbon Dioxide, Solid or Dry Ice
Safety Data Sheet

Date of issue: 01/01/1997      Revision date: 01/12/2015      Supersedes: 05/01/2009

---

### 3.2. Mixture

Not applicable

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

- **First-aid measures after inhalation**: Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Apply artificial respiration if breathing stopped.

- **First-aid measures after skin contact**: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes.

- **First-aid measures after eye contact**: Immediately flush eyes thoroughly with water for at least 15 minutes. Hold the eyelids open and away from the eyeballs to ensure that all surfaces are flushed thoroughly. Get immediate medical attention.

- **First-aid measures after ingestion**: Ingestion is not considered a potential route of exposure.

#### 4.2. Most important symptoms and effects, both acute and delayed

No additional information available

#### 4.3. Indication of any immediate medical attention and special treatment needed

None.

### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

No additional information available

#### 5.2. Special hazards arising from the substance or mixture

- **Reactivity**: None.

#### 5.3. Advice for firefighters

- **Firefighting instructions**: Evacuate all personnel from danger area. Do not discharge sprays onto solid carbon dioxide. Solid carbon dioxide will freeze water rapidly. NEVER HANDLE SOLID CARBON DIOXIDE WITH YOUR BARE HANDS. USE GLOVES OR DRY ICE TONGS OR A DRY SHOVEL OR SCOOP. Move packages away from fire area if safe to do so. Self-contained breathing apparatus may be required by rescue workers. On-site fire brigades must comply with OSHA 29 CFR 1910.156 and applicable standards under 29 CFR 1910 Subpart L—Fire Protection.

### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

- **General measures**: Use protective clothing. Wear cold-insulating gloves/face shield/eye protection. Chemical asphyxiant. Exposure to low concentrations for extended periods may result in dizziness or unconsciousness, and may lead to death. Wear self-contained breathing apparatus when entering area unless atmosphere is proven to be safe. NEVER HANDLE SOLID CARBON DIOXIDE WITH YOUR BARE HANDS. USE GLOVES OR DRY ICE TONGS OR A DRY SHOVEL OR SCOOP.

##### 6.1.1. For non-emergency personnel

No additional information available

##### 6.1.2. For emergency responders

No additional information available

#### 6.2. Environmental precautions

Prevent waste from contaminating the surrounding environment. Prevent soil and water pollution. Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements.

#### 6.3. Methods and material for containment and cleaning up

No additional information available
6.4. Reference to other sections
See also sections 8 and 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Precautions for safe handling: Avoid materials incompatible with cryogenic use; some metals such as carbon steel may fracture easily at low temperature. Vapor can cause rapid suffocation due to oxygen deficiency. Never allow any unprotected part of your body to touch solid carbon dioxide or to touch uninsulated pipes or vessels containing solid or liquid carbon dioxide or cold carbon dioxide gas. Not only can you suffer frostbite, your skin may stick fast to the cold surfaces. Use tongs or insulated gloves when handling solid carbon dioxide or objects in contact with cold carbon dioxide in any form. Wear protective clothing and equipment as prescribed in section 8. For other precautions in using carbon dioxide, see section 16.

7.2. Conditions for safe storage, including any incompatibilities
Storage conditions: Store and use with adequate ventilation. Do not store in tight containers or confined spaces. Storage areas should be clean and dry. Solid carbon dioxide is generally delivered to customers in 50-lb (22.7-kg), ½-cubic ft (0.0142 cubic meter) blocks (approximate dimensions), wrapped in kraft paper. Small pellets or nuggets are also produced. The product should be stored in insulated containers that open from the top. Lids should fit loosely so the carbon dioxide vapor given off as the solid sublimes can escape into the atmosphere. Carbon dioxide gas is about 1½ times as heavy as air and will accumulate in low-lying areas, so ventilation must be adequate at floor or below grade level.

7.3. Specific end use(s)
None.

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>ACGIH</td>
</tr>
<tr>
<td>ACGIH</td>
</tr>
<tr>
<td>USA OSHA</td>
</tr>
<tr>
<td>USA OSHA</td>
</tr>
</tbody>
</table>

8.2. Exposure controls
Appropriate engineering controls: Oxygen detectors should be used when asphyxiating gases may be released. Ensure exposure is below occupational exposure limits (where available). Systems under pressure should be regularly checked for leakages. Provide adequate general and local exhaust ventilation. Consider work permit system e.g. for maintenance activities.

Hand protection: Cold-insulating gloves.

Eye protection: Wear safety glasses with side shields.

Respiratory protection: When workplace conditions warrant respirator use, follow a respiratory protection program that meets OSHA 29 CFR 1910.134, ANSI Z88.2, or MSHA 30 CFR 72.710 (where applicable). Use an air-supplied or air-purifying cartridge if the action level is exceeded. Ensure that the respirator has the appropriate protection factor for the exposure level. If cartridge type respirators are used, the cartridge must be appropriate for the chemical exposure (e.g., an organic vapor cartridge). For emergencies or instances with unknown exposure levels, use a self-contained breathing apparatus (SCBA).

Thermal hazard protection: Wear cold insulating gloves.

Environmental exposure controls: None necessary.

Other information: Wear safety shoes while handling containers.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties
Physical state: Solid
Appearance: Opaque. White crystalline solid.
Molecular mass: 44 g/mol
### Color
- Color: White.

### Odor
- Odor: No data available
- Odor threshold: No data available

### pH
- pH: 3.7 (carbonic acid)

### Relative evaporation rate (butyl acetate=1)
- Relative evaporation rate: No data available

### Relative evaporation rate (ether=1)
- Relative evaporation rate: Not applicable.

### Melting point
- Melting point: -78.5 °C

### Freezing point
- Freezing point: No data available

### Boiling point
- Boiling point: -78.5 °C

### Flash point
- Flash point: Not applicable.

### Critical temperature
- Critical temperature: 30 °C

### Auto-ignition temperature
- Auto-ignition temperature: Not applicable.

### Decomposition temperature
- Decomposition temperature: No data available

### Flammability (solid, gas)
- Flammability: No data available

### Vapor pressure
- Vapor pressure: 5730 kPa

### Critical pressure
- Critical pressure: 7375 kPa

### Relative vapor density at 20 °C
- Relative vapor density: No data available

### Relative density
- Relative density: 0.82

### Specific gravity / density
- Specific gravity: 1562 kg/m³
- Relative gas density: 1.52

### Solubility

### Log Pow
- Log Pow: 0.83

### Log Kow
- Log Kow: Not applicable.

### Viscosity, kinematic
- Viscosity, kinematic: Not applicable.

### Viscosity, dynamic
- Viscosity, dynamic: Not applicable.

### Explosive properties
- Explosive properties: Not applicable.

### Oxidizing properties
- Oxidizing properties: None.

### Explosive limits
- Explosive limits: Not applicable.

### 9.2. Other information
- Sublimation point: -78.5 °C Expansion ratio for solid to gas at sublimation point is 1 to 554.
- Additional information: Gas/vapor heavier than air. May accumulate in confined spaces, particularly at or below ground level.

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity
- Reactivity: None.

#### 10.2. Chemical stability
- Chemical stability: Stable under normal conditions.

#### 10.3. Possibility of hazardous reactions
- Possibility of hazardous reactions: None.

#### 10.4. Conditions to avoid
- Conditions to avoid: None under recommended storage and handling conditions (see section 7).

#### 10.5. Incompatible materials
- Incompatible materials: Alkali metals, Alkaline earth metals, Acetylide forming metals, Chromium, Titanium > 1022°F (550°C), Uranium (U) > 1382°F (750°C), Magnesium > 1427°F (775°C).

#### 10.6. Hazardous decomposition products
- Hazardous decomposition products: Electrical discharges and high temperatures decompose carbon dioxide into carbon monoxide and oxygen.
## SECTION 11: Toxicological information

### 11.1. Information on toxicological effects

SECTION 14: Transport information

In accordance with DOT
Transport document description : UN1845 Carbon dioxide, solid, 9
UN-No.(DOT) : UN1845
Proper Shipping Name (DOT) : Carbon dioxide, solid
Department of Transportation (DOT) Hazard Classes : 9 - Class 9 - Miscellaneous hazardous material 49 CFR 173.140
Hazard labels (DOT) : 9 - Class 9 (Miscellaneous dangerous materials)

DOT Symbols : A - Material is regulated as a hazardous material only when be transported by air,W - Material is regulated as a hazardous material only when be transported by water

Additional information
Emergency Response Guide (ERG) Number : 120 (UN1013)
Other information : No supplementary information available.
Special transport precautions : Avoid transport on vehicles where the load space is not separated from the driver’s compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers:
- Ensure there is adequate ventilation.
- Ensure that containers are firmly secured.
- Ensure cylinder valve is closed and not leaking.
- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
- Ensure valve protection device (where provided) is correctly fitted.

Transport by sea
UN-No. (IMDG) : 1845
Proper Shipping Name (IMDG) : CARBON DIOXIDE, SOLID (DRY ICE)
Class (IMDG) : 9 - Miscellaneous dangerous compounds

Air transport
UN-No.(IATA) : 1845
Proper Shipping Name (IATA) : Carbon dioxide, solid
Class (IATA) : 9 - Miscellaneous Dangerous Goods

SECTION 15: Regulatory information

15.1. US Federal regulations
Carbon Dioxide, Solid or Dry Ice (124-38-9)
Listed on the United States TSCA (Toxic Substances Control Act) inventory
SARA Section 311/312 Hazard Classes Immediate (acute) health hazard

15.2. International regulations
CANADA
Carbon Dioxide, Solid or Dry Ice (124-38-9)
Listed on the Canadian DSL (Domestic Substances List)
WHMIS Classification Class A - Compressed Gas

EU-Regulations
Carbon Dioxide, Solid or Dry Ice (124-38-9)
Listed on the EEC inventory EINECS (European Inventory of Existing Commercial Chemical Substances)
Classification according to Regulation (EC) No. 1272/2008 [CLP] Not classified
Carbon Dioxide, Solid or Dry Ice
Safety Data Sheet P-4575

Date of issue: 01/01/1997    Revision date: 01/12/2015    Supersedes: 05/01/2009

15.2.2. National regulations

<table>
<thead>
<tr>
<th>Carbon Dioxide, Solid or Dry Ice (124-38-9)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listed on the AICS (Australian Inventory of Chemical Substances)</td>
</tr>
<tr>
<td>Listed on IECSC (Inventory of Existing Chemical Substances Produced or Imported in China)</td>
</tr>
<tr>
<td>Listed on the Japanese ENCS (Existing &amp; New Chemical Substances) inventory</td>
</tr>
<tr>
<td>Listed on the Korean ECL (Existing Chemicals List)</td>
</tr>
<tr>
<td>Listed on NZIoC (New Zealand Inventory of Chemicals)</td>
</tr>
<tr>
<td>Listed on PICCS (Philippines Inventory of Chemicals and Chemical Substances)</td>
</tr>
<tr>
<td>Listed on the Canadian IDL (Ingredient Disclosure List)</td>
</tr>
</tbody>
</table>

15.3. US State regulations

<table>

</tbody>
</table>

SECTION 16: Other information

Revision date : 1/12/2015 12:00:00 AM

NFPA health hazard : 3 - Short exposure could cause serious temporary or residual injury even though prompt medical attention was given.

NFPA fire hazard : 0 - Materials that will not burn.

NFPA reactivity : 0 - Normally stable, even under fire exposure conditions, and are not reactive with water.

NFPA specific hazard : SA - This denotes gases which are simple asphyxiants.

HMIS III Rating

Health : 3 Serious Hazard - Major injury likely unless prompt action is taken and medical treatment is given.

Flammability : 0 Minimal Hazard

Physical : 0 Minimal Hazard

SDS US (GHS HazCom 2012) - Praxair

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
