

# Physics 536 Spring 2008 Project - Due April 25<sup>th</sup>

**Instructions:** Pick a particular electronic component, device or *small* system, and prepare a 2-3 page report describing applications, operating principles, design considerations and examples.

For example, if you selected *lock-in amplifiers* you would describe how they are used for making very low-noise current and voltage measurements on devices that are maintained at very low temperatures.

You can use a variety of resources for picking a topic. Some suggestions are

Physics Today		Look at the advertisements
Keithley	<a href="http://www.keithely.com">http://www.keithely.com</a>	Measurement devices
Analog Devices	<a href="http://www.analog.com">http://www.analog.com</a>	Analog/Digital integrated circuits
Dallas/Maxim Semiconductors	<a href="http://www.maxim-ic.com">http://www.maxim-ic.com</a>	Integrated circuits
ATMEL	<a href="http://www.atmel.com/products/CCD">http://www.atmel.com/products/CCD</a>	CCD image sensors
Fairchild Semiconductor	<a href="http://www.fairchildsemi.com">http://www.fairchildsemi.com</a>	All kinds of stuff
ON Semiconductor	<a href="http://www.onsemi.com">http://www.onsemi.com</a>	All kinds of stuff
Vishay	<a href="http://www.vishay.com">http://www.vishay.com</a>	Active discrete components
Texas Instruments	<a href="http://www.ti.com">http://www.ti.com</a>	All kinds of stuff
AVX Corp.	<a href="http://www.avxcorp.com">http://www.avxcorp.com</a>	Capacitors

Examples of devices or instruments you might want to describe include

- Lock-in amplifiers
- Instrumentation amplifiers
- Different types of capacitors
- Component packaging
- Designing with ECL logic
- CCD image sensors
- Overview of VME bus protocols
- Fiber optics drivers/receivers

Check with me if you need help picking a topic or want to discuss the scope of your topic.
